# HIGH CONCENTRICITY NMR SAMPLE TUBES from AMPOL... YOUR BEST VALUE!

Ampol maintains strict concentricity and very high tolerances in its manufacture of Precision NMR Sample Tubes. Once you begin using Ampol NMR Tubes, you may discover that shimming is not required when you change the tubes in your NMR probe. Please note that our most popular AP5-400-7 NMR tube, recommended for 300 / 400MHz NMR equipment comes with 15 micron tolerance for both concentricity and camber. Our AP5-600-7, second most popular NMR tube, is recommended for 500/700 MHz NMR units and retains tolerance of 10 microns.

## 2003 U.S. PRICE LIST

*Distributed By:*

**CALL AMPOL**
